PROFILE

AI governance and product researcher with experience translating synthetic-media risks, AI policy, and behavioral research into practical tools and evidence frameworks. Combines applied research, bilingual survey design, and cross-functional product development experience.

EDUCATION

The University of Hong Kong — Hong Kong
M.A. in AI, Ethics and Society — *2025 – 2026*

- GPA: 3.45/4.30.

Lingnan University — Hong Kong
B.Soc.Sc. in Business Psychology — *2021 – 2025*

PROFESSIONAL EXPERIENCE

FacesMarket — Shenzhen, China
Researcher, AI Governance and Synthetic Media — *Jun 2026 – Present*

- Research regulatory, ethical, and operational issues in AI-generated actors, digital humans, facial likeness, synthetic voice, portrait rights, and commercial media production.
- Track developments in synthetic-media labeling, consent, identity verification, data protection, provenance, and platform responsibility.
- Produce research reports, case analyses, and public-facing articles that turn governance questions into practical guidance for creators and AI-media organizations.
- Help shape permission-first workflows for likeness and voice use, including authorization records, usage boundaries, evidence retention, and traceability.

Best Top Consulting Pte. Ltd. — Remote / Singapore
AI Product Development Intern — *May 2025 – Aug 2025*

- Refined prompts and conversational flows for an AI-supported psychological assessment built on a 16-dimension evaluation framework; contributed to an approximately 40% increase in user completion.
- Mapped Singapore's SkillsFuture framework to an internal assessment pipeline covering more than 1,800 occupational records.
- Worked with engineering staff to test outputs, document failure cases, and improve prompts using user feedback and observed interaction patterns.

RESEARCH EXPERIENCE

The Chinese University of Hong Kong — Hong Kong
Research Assistant, Organizational Behavior — *Jan 2026 – Aug 2026*
Supervisor: Prof. Xuan Liu

- Review research on AI, job search, career behavior, and employee adaptation to support construct development and hypothesis formulation.
- Compare psychological measures by construct definition, psychometric evidence, item wording, and suitability for bilingual studies.
- Design and revise Chinese–English Qualtrics surveys, including branching logic, attention checks, participant flow, and data-quality safeguards.
- Clean and merge labor-market datasets from multiple sources; reconcile coding and prepare analysis-ready files.

The Chinese University of Hong Kong — Hong Kong
Research Assistant, Industrial and Organizational Psychology — *Jun 2024 – Aug 2024*
Supervisor: Prof. Julian Pfrombeck

- Supported a four-wave longitudinal study of digitization, employee adaptation, and successful aging at work among adults in Hong Kong.
- Developed and administered bilingual Qualtrics surveys; supported translation, testing, recruitment materials, and participant communication.
- Recruited older employees through community outreach and checked missing data, duplicate responses, completion quality, and participant retention.

SELECTED PROJECTS

AI-Generated Actor Compliance Assessment — *2025 – Present*

- Designed a compliance case-management prototype for synthetic-media use, covering consent scope, likeness and voice

rights, labeling, provenance, evidence review, approvals, and audit history.
- Built a product-facing web demo with a review dashboard and case workflows for intake, risk review, evidence, remediation tasks, approvals, and reporting; published the static demo on GitHub Pages.
- Developed a separate FastAPI reference backend with Pydantic schemas, rule-based assessment, SQLite records, reports, role-aware review actions, retention controls, and audit logs; added tests for consent, labeling, hard-stop rules, and review workflows.

Navigating Diversity: Network Crafting Across Work and Home *2023 – Present*

- Co-developed a multi-study model of how network crafting builds social and psychological resources and relates to work and family outcomes in diverse workgroups.
- Study 1 used a three-wave survey of 222 employees; Study 2 used a three-day diary design with 199 participants. Examined positive affect as a mediator and workgroup diversity as a moderator.
- Contributed to theory development, manuscript preparation, statistical reporting, and interpretation; analyses included confirmatory factor analysis, mediation and moderation, structural equation modeling, and multilevel modeling.

SELECTED PUBLICATION & PRESENTATION

Wang, H.*, Cheng, Y.*, van Gool, P., & Zhang, Z. (Revise and resubmit). "Navigating Diversity: The Role of Network Crafting in Resource Enrichment Across Work and Home." *Career Development International*.
**Co-first authors.*

- Cheng, Y., Wang, H., van Gool, P., & Zhang, Z. "Enhancing Creativity in Diverse Workgroups: The Role of Network Crafting." First-author presentation, Chinese Association of Social Psychology Annual Meeting, Guilin, China, Aug 2024.

SKILLS

Research: Survey design; longitudinal and diary studies; literature synthesis; measurement evaluation; data cleaning; mediation and moderation; structural equation modeling; multilevel modeling.
Tools: Qualtrics; Python; web-based prototyping.
Topics: AI governance; synthetic media; organizational behavior; employee adaptation; workplace diversity.
